

# A Simple PowerShell Project

Create a JSON File with the following information:

Product Name	Price
Phone	200
Charger	20
Headphones	100
Case	40
Speaker	90

Create a PowerShell script that will:

1. Import the JSON file information into the PowerShell script.
2. Output the name and price of products over \$50 to a CSV file. The CSV file should have the products listed alphabetically.

**Please note that you must create a least one function or class as part of this exercise**

## Prerequisites

Computer with Visual Studio Code, including PowerShell extension, installed. Access to the Internet.
